

## Mobile Ozone Generator TRMG-603

[www.chinascientific.com](http://www.chinascientific.com) | [info@chinascientific.com](mailto:info@chinascientific.com)

## **Description**

Mobile Ozone Generator TRMG-603 works on the principle of a tube type-high voltage discharge gap to avoid water outflow and disinfect the water. It includes your cooling method. It is made of stainless steel. To conduct business this same machine has a refrigerating air intake and an operations and maintenance panel. It produces 40 to 50 g of ozone every hour.

## **Features:**

It is due to the high concentration of ozone

It is ionized at a high voltage

It operates on the principle of a high voltage discharge gap in a tube

It includes a bring-your-own-cooling method

It is constructed of stainless steel

## Specifications :

<b>Ozone output</b>	40 to 50 g/h
<b>Packing Size</b>	1050×450×350 mm
<b>Power</b>	220V-50HZ
<b>Working Control</b>	Loop- dual-mode timer
<b>Working Principle</b>	Tube type-high voltage discharge gap
