

## Portable Ozone Generator TROG-601

[www.chinascientific.com](http://www.chinascientific.com) | [info@chinascientific.com](mailto:info@chinascientific.com)

## Description

Portable Ozone Generator TROG-601 is a convenient and portable device. It can work on different sterilization and purification treatments. It applies to using both air and water, with the working principle of the tube type-high voltage discharge gap. It can produce O<sub>3</sub> at a rate of 3 g/h. and is equipped with stainless steel. It has good performance and long service life.

## Features:

It is having with good performance and long life

It is equipped with a stainless steel chamber

This applies to the use of air and water due to the operating principle of tube-type high voltage discharge paths

It has a lightweight and portable device

It can generate O<sub>3</sub> ranges

It is having with an ozone concentration

Intended with a high voltage ionization

It is both industry and household type

It is an automatic control time type device

It is having with a cool wind of Byo

## Specifications :

<b>Application</b>	Both can use air and water
<b>O3 range</b>	3g/h
<b>Overall size</b>	500 ×160× 220 mm
<b>Packing Size</b>	550×220×270 mm
<b>Power</b>	220V/ 50HZ
